Information on weekly deaths

Things you need to know

Weekly death figures provide provisional counts of the number of deaths registered in England and Wales for which data are available, and the number of deaths for which the underlying cause was coded to respiratory diseases as defined in the International Statistical Classification of Diseases and Related Health Problems Tenth Revision (ICD-10).

From 31 March 2020 these figures also show the number of deaths involving coronavirus (COVID-19), based on any mention of COVID-19 on the death certificate.

These figures are also presented by age group, sex and by area of usual residence.

Notes and definitions

Deaths occurring in England and Wales are registered on the General Register Office's Registration Online system (RON).

Daily extracts of death registration records from RON are processed on our database systems.

Provisional data on deaths registered in each week (ending on a Friday) are compiled at the end of the following week.

Bank Holidays could affect the number of registrations made within those weeks.

The counts of deaths from specific conditions are updated with each weekly publication as the coding of the underlying cause is not always complete at the time of production.

For deaths registered from 1st January 2020, cause of death is coded to the ICD-10 classification using MUSE 5.5 software. Previous years were coded to IRIS 4.2.3, further information about the [change in software is available](#).

Where there are the same values in categories in consecutive weeks, the counts have been checked and are made up of unique death registrations.

Figures for the latest week are based on boundaries as of May 2020.

[The ONS policy on protecting confidentiality in birth and death statistics is available on our website.](#)

Further information and enquiries

Special extracts and tabulations of mortality data for England and Wales are available to order for a charge (subject to legal frameworks, disclosure control, resources and the [ONS charging policy](#), where appropriate). Enquiries should be made to Mortality Analysis Team (health.data@ons.gov.uk or telephone: +44 (0)1633 456490). User requested data will be published onto our [website](#).

Access to microdata and disclosive data, that is, data which have the potential to identify an individual record, requires the approval of the ONS Microdata Release Procedure (MRP) before the data can be provided.

Terms and conditions

A National Statistics publication

National Statistics are produced to high professional standards set out in the Code of Practice for Official Statistics. They are produced free from any political interference.

The UK Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

Designation can be broadly interpreted to mean that the statistics:

- meet identified user needs
- are well explained and readily accessible
- are produced according to sound methods
- are managed impartially and objectively in the public interest

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice shall continue to be observed.

About us

We are the executive office of the UK Statistics Authority, a non-ministerial department which reports directly to Parliament and the UK government's single largest statistical producer. We compile information about the UK's society and economy, and provide the evidence-base for policy and decision-making, the allocation of resources, and public accountability.

Weekly provisional figures on deaths registered⁶ in England and Wales

Note that up-to-date counts of the total numbers of deaths involving coronavirus (COVID-19) are published by Department of Health and Social Care (DHSC) on the GOV.UK website. ONS figures differ from the DHSC counts as the latter include deaths which have not yet been registered.

Footnotes:

¹ This average is based on the actual number of death registrations recorded for each corresponding week over the previous five years. Moveable public holidays, when register offices are closed, affect the number of registrations made in the published weeks and in the corresponding weeks in previous years.

² Counts of deaths by underlying cause exclude deaths at age under 28 days. Counts of deaths involving Covid-19 will include neonatals.

³ Coding of deaths by cause for the latest week is not yet complete.

⁴ For deaths registered from 1st January 2020, cause of death is coded to the ICD-10 classification using MUSE 5.5 software. Previous years were coded to IRIS 4.2.3, further information about [the change in software](#) is available.

⁵ An 'underlying cause of death' refers to the main cause of death, whereas a cause being 'mentioned on the death certificate' means that it might be the main reason or a contributory reason to the cause of death.

⁶ Does not include deaths where age is either missing or not yet fully coded. For this reason counts of 'Persons', 'Males' and 'Females' may not sum to 'Total Deaths, all ages'.

⁷ Does not include deaths of those resident outside England and Wales or those records where the place of residence is either missing or not yet fully coded. For this reason counts for "Deaths by Region of usual residence" may not sum to "Total deaths, all ages".

⁸ These figures represent death registrations, there can be a delay between the date a death occurred and the date a death was registered. More information can be found in our [impact of registration delays release](#).

[Contents](#)**Weekly provisional figures on deaths registered⁶ where coronavirus (COVID-19)³ was mentioned on the death certificate in England and Wales**

Note that up-to-date counts of the total numbers of deaths involving coronavirus (COVID-19) are published by Department of Health and Social Care (DHSC). ONS figures differ from the DHSC counts as the latter include deaths which have not yet been registered.

Footnotes:

¹ Coding of deaths by cause for the latest week is not yet complete.

² For deaths registered from 1st January 2020, cause of death is coded to the ICD-10 classification using MUSE 5.5 software. Previous years were coded to IRIS 4.2.3, further information about [the change in software](#) is available.

³ Deaths involving COVID-19 have been included within weekly death registrations figures due to the pandemic.

⁴ Does not include deaths where age is either missing or not yet fully coded. For this reason counts of 'Persons', 'Males' and 'Females' may not sum to 'Total Deaths, all ages'.

⁵ Does not include deaths of those resident outside England and Wales or those records where the place of residence is either missing or not yet fully coded. For this reason counts for "Deaths by Region of usual residence" may not sum to "Total deaths, all ages".

⁶ These figures represent death registrations, there can be a delay between the date a death occurred and the date a death was registered. More information can be found in our [impact of registration delays release](#).

E12000009	South West	0	0	0
W92000004	Wales	0	0	0

Footnotes:

¹ Coding of deaths by cause for the latest week is not yet complete.

² For deaths registered from 1st January 2020, cause of death is coded to the ICD-10 classification. Previous years were coded to IRIS 4.2.3, further information about [the change in software](#) is available.

³ Deaths involving COVID-19 have been included within weekly death occurrence figures due to the change in software.

⁴ Does not include deaths where age is either missing or not yet fully coded. For this reason counts 'Females' may not sum to 'Total Deaths, all ages'.

⁵ Does not include deaths of those resident outside England and Wales or those records where the region is missing or not yet fully coded. For this reason counts for "Deaths by Region of usual residence" may not sum to "Total Deaths, all ages".

⁶ These figures represent death occurrences, there can be a delay between the date a death occurred and the date it was registered. More information can be found in our [impact of registration delays release](#).

⁷ONS deaths by actual date of death – registered by 29 August.

Footnotes:

¹ Weekly deaths for Scotland are produced by [National Records Scotland \(NRS\)](#).

² Weekly deaths for Northern Ireland are produced by [Northern Ireland Statistics and Research Agency \(NISRA\)](#).

³ All data is provisional.

⁴ All data is based on date of registration rather than occurrence. More details can be found in each departments release.

⁵ England, Wales and Northern Ireland weekly deaths run from Saturday to Friday, Scotland deaths run from Monday to Sunday.

⁶ Northern Ireland week allocation differs from other countries. For example, week 1 is week ending 10-Jan. This has been adjusted for the purpose of aggregating the data.

Footnotes:

¹ Coding of deaths by cause for the latest week is not yet complete.

² For deaths registered from 1st January 2020, cause of death is coded to the ICD-10 classification using software. Information about [the change in software](#) is available.

³ Deaths involving COVID-19 have been included within weekly death registrations figures due to the presence of COVID-19 in the underlying cause of death.

⁴ England, Wales and English regions data does not include deaths of those resident outside England and Wales.

⁵ These figures represent death registrations, there can be a delay between the date a death occurred and the date it is registered. For more information see [registration delays release](#).

⁶ Data for Scotland are produced by [National Records Scotland \(NRS\)](#).

⁷ Data for Northern Ireland are produced by [Northern Ireland Statistics and Research Agency \(NISRA\)](#).

⁸ UK data is calculated using the England and Wales country specific data rather than England and Wales data.

Footnotes:

¹ Coding of deaths by cause for the latest week is not yet complete.

² For deaths registered from 1st January 2020, cause of death is coded to the ICD-10 classification using software. Information about [the change in software](#) is available.

³ Deaths involving COVID-19 have been included within weekly death occurrences figures due to the presence of COVID-19 in the death certificate.

⁴ England, Wales and English regions data does not include deaths of those resident outside England and Wales.

⁵ These figures represent death occurrences, there can be a delay between the date a death occurred and the date it is recorded in the register. For more information see [registration delays release](#).

⁶ Data for Scotland are produced by [National Records Scotland \(NRS\)](#).

⁷ Data for Northern Ireland are produced by [Northern Ireland Statistics and Research Agency \(NISRA\)](#).

⁸ UK data is calculated using the England and Wales country specific data rather than England and Wales data.

Other communal establishment	1,674	224	1,589	209	
Elsewhere	9,065	202	8,300	190	

Footnotes:

¹ Coding of deaths by cause for the latest week is not yet complete.

² For deaths registered from 1st January 2020, cause of death is coded to the ICD-10 classification using MU were coded to IRIS 4.2.3, further information about [the change in software](#) is available.

³ Deaths involving COVID-19 have been included within weekly death registrations figures due to the pandemic.

⁴ Does not include deaths where age is either missing or not yet fully coded. For this reason counts of 'Person' sum to 'Total Deaths, all ages'.

⁵ Non-residents are included in the England and Wales total but not England and Wales separately. For this reason "Wales" may not sum to "England and Wales".

⁶ These figures represent death registrations, there can be a delay between the date a death occurred and the date it is registered. More information can be found in our [impact of registration delays release](#).

⁷ Deaths at home are those at the usual residence of the deceased (according to the informant), where this is the usual residence. Care homes includes homes for the chronic sick; nursing homes; homes for people with mental health problems; Hospices include Sue Ryder Homes; Marie Curie Centres; oncology centres; voluntary hospice units; and private hospices. Other Communal Establishments include schools for people with learning disabilities; holiday homes and holiday camps; university and college halls of residence; young offender institutions; secure training centres; detention centres; and residential care homes. Elsewhere includes all places not covered above such as deaths on a motorway; at the beach; climbing a rock face. This category also includes people who are pronounced dead on arrival at hospital.

⁸ These figures are calculated using the most up-to-date data we have available to get the most accurate estimates.

⁹ We have made improvements in the way we code place of death estimates and therefore there may be differences between these figures and those published previously.

[User guide to mortality statistics](#)

Supporting information for these tables can be found in the User guide to mortality statistics

[Quality and Methodology Information](#)

A Quality and Methodology Information document contains important information on:

- the strengths and limitations of the data
- the quality of the output: including the accuracy of the data, how it compares with related data
- uses and users
- how the output was created

Further mortality statistics based on death registrations are available on the ONS website:

[Deaths registered in England and Wales](#)

The summary tables provide key death registration statistics for the reference year.

[Deaths registered in England and Wales \(Series DR\)](#)

Series DR (Mortality Statistics: Deaths Registered in England and Wales) provides detailed death registration statistics for the reference year. This includes numbers of deaths by detailed underlying cause by age-sex group defined by the different chapters of the Tenth Revision of the International Statistical Classification of Diseases and Related Health Problems (ICD-10).

[Deaths registered monthly in England and Wales](#)

To meet user needs, very timely but provisional counts of monthly death registrations in England and Wales are published by area of usual residence. Figures remain provisional until final annual data are released.

[Vital statistics in the UK: births, deaths and marriages](#)

These tables provide annual data for a selection of key statistics under the following themes: population, demography and health. Figures for the latest years may be provisional, these will be updated to final figures when data are available.

[Deaths registered by area of usual residence, UK](#)

Presents data on death registrations in the UK by area of usual residence. The release contains a summary table providing key mortality measures (numbers and rates including age standardised mortality rates) for the UK and its constituent countries and a table providing numbers of deaths in England and Wales by age and sex.

[Explorable datasets for mortality statistics in England and Wales](#)

This dataset provides mortality statistics in England and Wales, broken down by calendar year of registration, age, sex, underlying cause of death and other selected information collected at the time of registration.
